

This Christmas treat yourself or someone you love to a deeper understanding of organic horticulture

“Working With Nature – Shifting Paradigms” offers a truly holistic view of horticulture. This book has clear, concise descriptions of everything I had been questioning in the standard soil science texts I was familiar with, and introduces accurate, up to date, well referenced scientific data in an easy to understand format. At last! A break-through in horticultural textbooks, and one with ethics and heart.” *Connie Kuramoto, Horticulture Instructor and Technician, Malaspina University College; Owner, “Gardens on the Go” Horticultural Services*

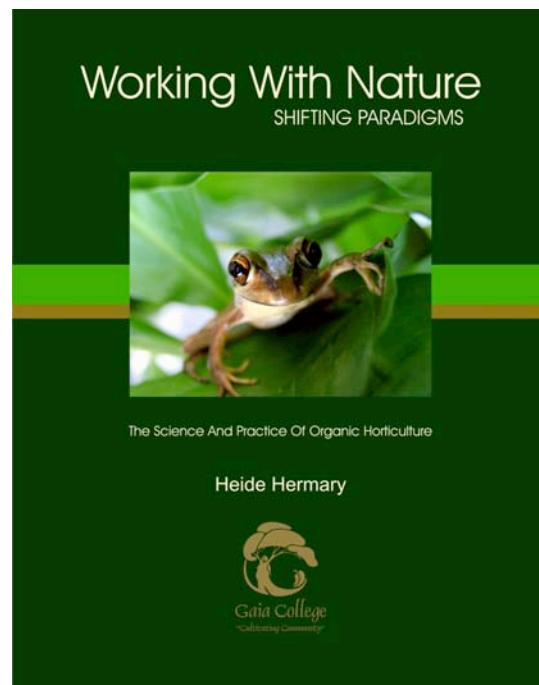

\$65.00 plus \$20.00 Shipping

8 1/2 x 11 - 244 pages

Spiral bound - ISBN 978-0-9735687-1-4

Soft cover - ISBN 978-0-9735687-2-1

Available directly from Gaia College.

“I am thoroughly impressed with this groundbreaking work; based on cutting edge science, it is written with contagious passion and courage. “Working With Nature – Shifting Paradigms” is a must-have for anyone who is looking for the big picture of organic land management, whether you’re a grower, landscaper, golfer, or home gardener.” *Christina Nikolic, Illustrator; Landscape Designer; Horticulture Instructor, Camosun College*

“Working With Nature – Shifting Paradigms” is a serious book about organic land care, and while Heide Hermary could well have chastised us for our past deeds she chooses to focus instead on convincing us through impressive amounts of science and research that we would be wise to change our conventional landscape strategies from ones of dominance to those of support. With a growing public awareness and concerns about the use of dangerous chemicals, and the organic land care industry in the double digit growth zone one can only assume these changes are a matter of ‘when’ and not ‘if’.”

Dayle Cosway, Business Consultant; President, Society for Organic Urban Land Care
